Wild Wonders

Discover fascinating animals from around the world.

EDITION 1

HUMMINGBIRD

Hummingbirds are tiny birds that can hover in the air and even fly backward.

Their wings move so fast they make a soft humming sound.

Where they live: The Americas, from North to South

CAPYBARA

Capybaras are the world's largest rodents and are famous for being calm and friendly.

They love water and are often seen relaxing with other animals nearby.

Where they live: Wetlands and rivers in South America

RED PANDA

Red pandas are small, fluffy animals that love climbing trees and eating bamboo.

They use their long, bushy tails for balance and warmth.

Where they live: Cool mountain forests in parts of Asia

SLOTH

Sloths are slow-moving mammals that spend most of their lives hanging upside down in trees.

Their slow movement helps them stay hidden from predators.

Where they live: Tropical rainforests in Central and South America
